DELETING

1. Download the WordPress Package.
2. Upload the Package to your Hosting server.
3. Create the MySQL Database and User.
4. Fill the details in WordPress.
5. Run the WordPress Installation.
6. Install WordPress using Xampp.
7. Run localhost server .
8. Go to dashboard
9. You can change your theme from the WordPress admin dashboard.
Visit **Appearance » Themes** page and then click on the 'Add New' button.

10. . Add Content to Your Site

11. WordPress comes with two default content types called [posts and pages](#). Posts are part of the blogging functionality and appear in reverse-chronological order (newer items displayed first).
12. On the other hand, pages are meant to be static “one-off” type content such as your about page, contact page, privacy policy, custom landing page, etc.
13. By default, WordPress shows your blog posts on the front page of your website. You can change that, and make WordPress show any static page as the homepage of your website (we’ll show you how to do that later in this guide).
14. You can create a [separate page for your blog](#) or news section to show your recent posts. Alternatively, you can create a website without any blog section at all.
15. Having said that, let’s add some content to your website.
16. You’ll start by adding a few pages to your WordPress site. Don’t worry if you don’t have enough content for these pages at the moment. You can always edit and update them.
17. Head over to **Pages » Add New** page in WordPress admin area. This will bring you to the page editor screen, which will look similar to this, depending on your theme:
18. Now let’s add a few blog posts as well.
19. Head over to **Posts » Add New** in your WordPress admin area, where you will see a screen much like you saw earlier when adding pages

Customizing and Tweaking Your Website

Now that you have created some content for your own website, you will be able to customize and put it all in a nice presentable shape for your users.

Let’s start by setting up a static front page (also known as homepage).

Setting up a Static Front Page

You need to visit the **Settings » Reading** page in your WordPress admin dashboard. Under the ‘Front page displays’ option click on the static front page and then select ‘Pages’ you created earlier for your home and blog pages.

20. GO TO wordpress/fakepress-plugin.org

21. Download it & extract it.
22. Go to the dashboard section > plugins
23. Add and unpack done automatically.
24. Activate it after installing.
25. Left side on the navigation you can check the fakepress .
26. Click it and add desired ,fakes(posts,comments,pages,etc).
27. You can simply delete it by “Let it GO”.
28. Install Insert Headers and Footers by uploading the insert-headers-and-
footers directory to the /wp-content/plugins/ directory. ...
29. Activate Insert Headers and Footers through the Plugins menu in WordPress.
30. Insert code in your header or footer by going to the Settings > Insert Headers
and Footers menu.
31. Go to the WordPress Dashboard “Add New Plugin” section.
32. Search For “Insert Headers and Footers Script”.
33. Install, then Activate it.
34. On your WordPress Dashboard, **choose Appearance→Editor** to look at the
template files within a theme. The Edit Themes page appears and lists the
various templates available within the active theme.
35. **Go to WordPress Admin Panel > Pages > Add New.** You can see the new
custom page template listed on the right side. Create a new page and set its
template to PageWithoutSidebar. Once done, Publish it.
36. There are two options to completely delete all media in your WordPress
media library in bulk. One **using the WordPress admin page (safer)** and
one performing direct deletions using FTP/SSH/PHPMyAdmin, which is good
if you have thousands of items to delete.
37. On the top left side, there is a button **Bulk select**. Click it; now you have to
select the image that you want to delete. Hit Delete Selected to delete
selected images from the WordPress media gallery. This will permanently
delete your images from the server.
38. Below are executed online screenshots in detail:

The screenshot shows the WordPress dashboard interface. At the top, there's a header bar with tabs for 'Manage Themes' (active), 'My blog', 'How to Create a Custom WordPress Theme', 'blog-site-template/style.css at master · varunisai/b... · GitHub', and 'Download - Sublime Text'. Below the header is a search bar and a 'Themes' section. The left sidebar includes links for 'Dashboard', 'Posts', 'Media', 'Pages', 'Comments', 'Appearance' (selected), 'Themes', 'Widgets', 'Menus', 'Background', 'Theme Editor', 'Plugins' (with 1 update), 'Users', 'Tools', 'Settings', and 'Collapse menu'. The main content area displays three theme preview cards: 'Twenty Twenty' (active), 'Twenty Twenty-one', and 'Twenty Nineteen'. Each card shows a preview of the theme's design and a 'Customize' button. A large '+' icon is centered below the cards, with the text 'Add New Theme'. Below this is a 'Customize' button. The bottom part of the screen shows the live site preview with the 'FollowVarun' theme applied, featuring a dark header with 'Welcome' and a grid of small images. The taskbar at the bottom shows various open windows and system status.

The screenshot shows the same blog post "Sample Title 1". The sidebar on the left remains purple with the same navigation links. The main content area now features a placeholder image of a person working on a laptop with a coffee cup. The rest of the post content, including the author information and comment section, is identical to the first screenshot.

The screenshot displays a Windows desktop environment with two open browser windows.

Sample Page

This is an example page. It's different from a blog post because it will stay in one place and will show up in your site navigation (in most themes). Most people start with an About page that introduces them to potential site visitors. It might say something like this:

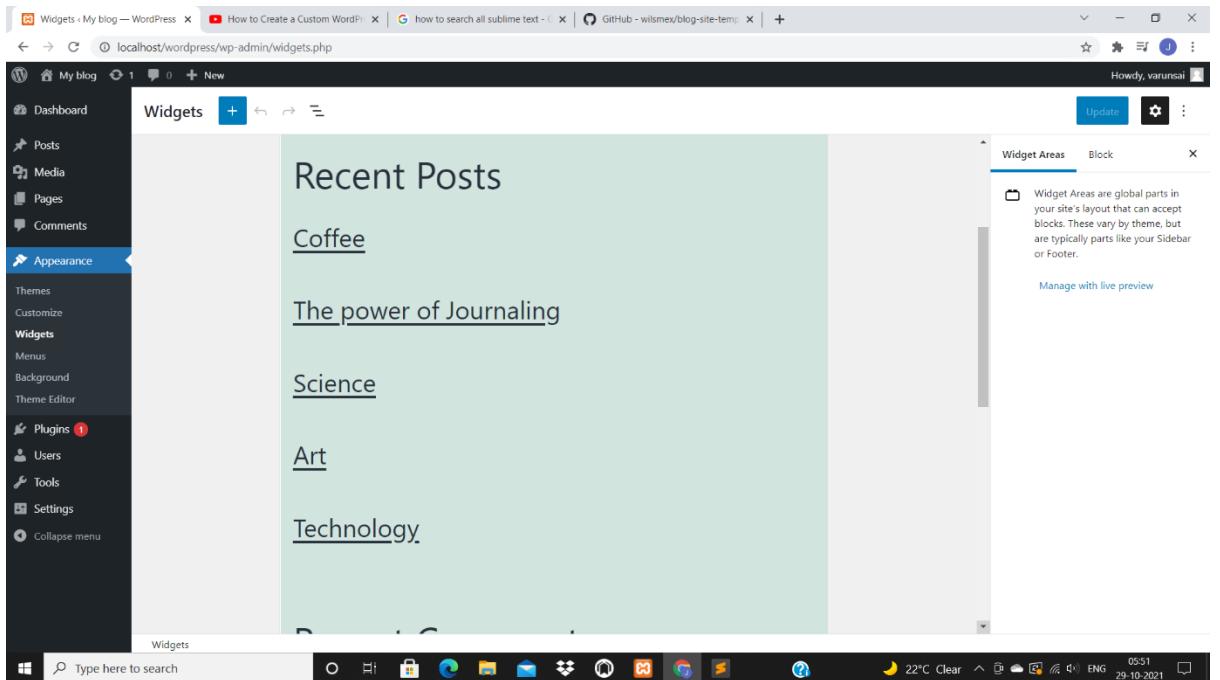

Hi there! I'm a bike messenger by day, aspiring actor by night, and this is my website. I live in Los Angeles, have a great dog named Jack, and I like piña coladas. (And gettin' caught in the rain.)

...or something like this:

The XYZ Doochickey Company was founded in 1971, and has been providing quality doohickeys to the public ever since. Located in Gotham City, XYZ employs over 2,000 people and does all kinds of awesome things for the Gotham community.

As a new WordPress user, you should go to [your dashboard](#) to delete this page and create new pages for your content. Have fun!

The image shows two screenshots of a Windows desktop environment. The top screenshot displays a WordPress website titled "Midterm exam — Just another WordPress site". The page features a large, dark blue background image of a mountain range and a wooden staircase leading up towards the mountains. Overlaid on the image is a large, bold, white text quote: "Eligendi aperiam harum doloremque a aut eveniet". The bottom screenshot shows the WordPress dashboard. The left sidebar includes links for Home, Posts, Media, Pages, Comments, Appearance, Plugins (with 1 update), Users, Tools, Settings, and a Collapse menu. The main content area on the dashboard has sections for "Welcome to WordPress!", "Get Started" (with a "Customize Your Site" button), "Site Health Status" (showing "No information yet..."), "At a Glance" (showing 1 Post and 1 Comment), and "Quick Draft" (a form for writing a new post). A sidebar on the right lists "More Actions" such as Manage widgets, Manage menus, Turn comments on or off, and Learn more about getting started. The taskbar at the bottom shows other open windows like "Dashboard - My blog - WordPress" and "Dashboard - Midterm exam - WordPress". The system tray indicates it's 01:18 on 30-10-2021, the temperature is 23°C, and the weather is Partly cloudy.

Below the list are buttons for 'Bulk actions' and 'Apply'. A note at the bottom says 'Thank you for creating with WordPress.' and 'Version 5.8.1'.

Screenshot of the WordPress admin interface showing the 'Meta Field Rules' configuration page. The sidebar on the left has 'FakerPress' selected under 'Posts'. The main area shows a configuration form for generating attachments.

The configuration fields include:

- Type: Attachment
- Name: _thumbnail_id
- Configuration: Attachment ID
- Placeholder: Placeholder (with options for Lorem Ipsum)
- Weight: 90
- Width Range: e.g.: 350 > e.g.: 900
- Height Range: e.g.: 125 > e.g.: 650

A 'Generate' button is at the bottom, and a status message at the bottom says 'Faked 10: 80, 82, 84, 86, 88, 90, 92, 94, 96, 98'.

The taskbar at the bottom shows various application icons and system status.

The screenshot shows the WordPress admin dashboard with a list of posts. The posts are as follows:
